GLIDE is a collection of shoes with our smoothest, softest rides. Built with the original HOKA ONE ONE® principles of maximum cushion and minimal weight, this category features plush cushion for any pace. GLIDE includes neutral, stability and recovery models, so no matter the athlete, they can go the distance in comfort. An effortless ride from start to finish, these shoes are your go-to for everyday miles. Ready, steady, GLIDE.

GLIDE

BONDI 7

UPPER

- Open-engineered mesh construction delivers breathable comfort
- Memory foam collar cradles ankle in plush comfort
- TPU overlays offer additional midfoot structure and support
- Internal heel counter provides a supportive, locked-in fit

MIDSOLE

- Full-length compression-molded EVA midsole
- Refined early-stage Meta-Rocker for a smooth ride

OUTSOLE

- Beveled heel design offers a smooth transition and increased durability
- Rubber outsole minimizes weight and maximizes durability

FLY

A CULMINATION of our most responsive up-tempo shoes, FLY continues to defy what's possible when you run in lightweight cushion. These shoes were made for everything from speed sessions and race day to gym workouts and everyday wear. FLY includes models for the gym and the road so you can get propulsive cushion in every activity. They were inspired by the weightless sensation of flight and provide ample cushion if you're on the roads, the treadmill or in a workout class. FLY knows no limits.

CARBON X-SPE

UPPER

- Light, stripped-back upper engineered in single-layer, polyester mesh
- Mesh bootie provides a secure fit
- Molded heel reinforcement for added support
- Tongue-free construction provides a comfortable, seamless fit

MIDSOLE

- Early stage Meta-Rocker delivers an uptempo and propulsive ride

- Light and resilient PROFLY X foam sits above the carbon fiber plate while rubberized foam sits below the plate
- Carefully positioned carbon fiber plate curls under the lateral toes to deliver a smooth transition through the gait cycle
- Wider forefoot platform provides support and stability along with an accommodating and comfortable fit

OUTSOLE

- Rubberized foam outsole offers a lightweight, responsive ground contact

SKY

SKY is a groundbreaking mountain footwear category ready for trail adventures. An against-the-grain approach to lightweight hiking boots, trail runners and all-terrain shoes, this category was built to help you touch the sky. These shoes have cushion, traction and support so you can traverse the most rugged landscapes at any speed. Complete with trail models and all-terrain shoes, this category performs no matter how far or high the trail leads. SKY empowers you to reach the peak.

TORRENT 2

UPPER

- Engineered mesh with recycled polyester fibers
- Reinforcing overlays provide protection against trail debris

MIDSOLE

- PROFLY™ midsole construction delivers a cushioned landing and propulsive toe-off

OUTSOLE

LIGHT AND FAST. Go from flying to soaring. RACE combines signature HOKA ONE ONE® ride characteristics with lighter, faster designs for the days you need to let 'er rip and show everyone what you're made of on the road or track. This collection cuts down on cushion, but the shoes still offer fantastic protection for their weight and responsiveness. Designed to meet the needs of the fastest runners in the world, they will help you reach new heights, set a PR or simply feel fast on your next starting line.

THE HOKA ONE ONE® DIFFERENCE

CUSHIONED MIDSOLE

[marshmallow-soft with speed]

Varying in thickness according to need, the super light and cushioned midsole offers shock absorption, comfort and support. Our goal at HOKA ONE ONE® is to make running easier. Easier for everyone – from the ultramarathoner to the person who runs as part of their fitness routine. Everyone likes easier.

CUSHIONED MIDSOLE BENEFITS

- Premium shock absorption
- Superior comfort
- Performance on runs of all distances

META-ROCKER

[the wheels to move you forward]

Meta-Rocker geometry, or wheels for your feet, drives the runner forward, reduces the differential in height between the heel and toe and complements the runner's normal gait cycle.

META-ROCKER BENEFITS

- Supports runners' natural running gait
- A smooth roll from impact to toe-off
- Designed to increase running efficiency

ACTIVE FOOT FRAME

[the bucket seat]

The Active Foot Frame beds the heel and foot deeply into the midsole and offers guidance to the foot without the need for "posts" or other foot constrictions. The Active Foot Frame functions like a bucket seat in a racecar by cradling the foot.

ACTIVE FOOT FRAME BENEFITS

- Integrated stability within the shoe
- Adaptability to a wide range of feet and running styles
- A comfortable alternative to traditional extra post support

J-FRAME™

[stability with freedom]

Dynamic Stability features the HOKA ONE ONE® J-Frame™, which uses the functionality of the Active Foot Frame but adds support with a firmer density foam on the medial side – where the over-pronating foot rolls in – all the way to the front of the shoe. This "J" also extends back with firmer sidewalls on the heel's lateral side. It delivers support and protection while guiding your foot without the use of heavy, rigid materials.

J-FRAME™ BENEFITS

- Designed to combat over-pronation
- Guides foot without rigid or unforgiving materials
- Delivers stability while maintaining a cushioned and lightweight ride

PROFLY™

[intelligent cushioning]

PROFLY™ is a dual-density midsole: softer in the heel for a cushioned landing and a higher-density foam in the forefoot for propulsion. It's a forgiving landing with a responsive toe-off.

PROFLY™ BENEFITS

- Softer cushioning for protection (heel)
- Firmer cushioning for propulsion (forefoot)
- A fast and comfortable ride

MATERIALS

GORE-TEX®

GORE-TEX® is a waterproof membrane that coats fabrics to make them fully waterproof. It's a performance-driven, gold standard technology that is breathable to keep you active in the harshest, wettest conditions.

WHEN AND WHY WE USE IT

We use GORE-TEX® technology in select HOKA trail shoes and hiking boots that need to perform in wet conditions. We're big fans of GORE-TEX® not only for its functionality but also for the brand's commitment to performance and innovation – something we value too.

VIBRAM® MEGAGRIP

Vibram® Megagrip is a high-performance, extra-sticky rubber. It provides exceptional grip and traction on wet or dry surfaces and is the industry leader in durable rubber for outdoor products.

WHEN AND WHY WE USE IT

We include Vibram® Megagrip as the outsole for select trail shoes and hiking boots that need intense grip on a variety of surfaces. We chose Vibram® Megagrip because it gives you grip in less-than-ideal conditions and helps you feel more secure on unpredictable terrain.

MATRYX®

MATRYX® is a lightweight, extra-durable woven material with hydrophobic properties. It's abrasion resistant to help you get the most out of your runs.

WHEN AND WHY WE USE IT

We use MATRYX® in the upper of select premium shoes that need more lockdown and protection against the elements. MATRYX® is a favorite of ours because it's unlike any other material out there. It's ridiculously light for how durable it is, and it performs in various conditions.

RUBBERIZED FOAM

Rubberized Foam is a proprietary blend of rubber and EVA. It features a low compression set and is resilient, providing an extra-springy feel.

WHEN AND WHY WE USE

We use Rubberized Foam on shoes that need a more energized and resilient ride. We often use it in the outsole because it's lighter than traditional rubber, more durable than EVA and provides a unique ride.
