

OOFOS®

ACTIVE RECOVERY

FALL / WINTER

2024

Backed by Science.

OOFOS are made with our proprietary OOfoam™ technology that absorbs impact, so your body doesn't have to.

Then there's the patented footbed design. Together, they are the foundation of every style we make - providing the perfect combination of soft and stable, cradling the arch and supporting the way you're built to move.

OOFoam absorbs 37% more impact than traditional foams

Reduces stress on sore feet, knees and back

Cradles and supports the arch

Enables more natural motion

All OOFOS carry the APMA Seal of Acceptance

**It's not just soft,
it's OOfoam™.**

The APMA Seal of Acceptance Program recognizes products that have been found to be beneficial to foot health and of significant value when used consistently in a daily foot care program. All OOFOS styles were found by the committee to promote good foot health, further establishing the therapeutic and health benefits of the brand's shoes.
